

DATE AND TIME

(CALENDER)

Do not forget our knowledge on cardinal and ordinal numbers. We use these numbers to express date and time.

DATE: for example we have two ways of expressing date e.g 1919 in French Dix- neuf, dix neuf meaning 1919

Another example is 1986 Mille neuf cent quatre-vingt six

TIME: in French , if you want to ask what time is it, this is one of the ways e.g Quelle l' heure, est-il ?
Meaning what is the time, the answer is Il est sept heures , It is seven o'clock for 12 hours and if it is 24 hours it will become Il est quatorze heures. Meaning it is 14 hours in the afternoon
